& DATASHEET

SICO-PROFISH – 60 CP nr. 3

Crude Protein 60% (with 70% fishmeal & 5% lysine)

Fishmeal replacer / analogue for use in poultry, pig, aquaculture, etc … rations

Revised 10/2019

PRODUCT DESCRIPTION

SICO-PROFISH® Fish Meal Replacer/Analogue is a high quality, protein supplement that can be used in poultry, pig and aquaculture, etc... rations worldwide.
SICO-PROFISH® Fish Meal Replacer/Analogue contains a nutrient profile comparable to fishmeal which could allow it to be substituted on an equal basis with fishmeal.
Uncertainty surrounding the South American fishing industry and the present E.U. ban on the use of animal proteins, cause concern for the feed manufacturers in their ability to source a stable quality fishmeal or other quality protein sources.
SICO-PROFISH® Fish Meal Replacer/Analogue offers the feed industry worldwide an economical alternative to fishmeal and it is available year-round.

INGREDIENTS

A combination of carefully screened marine (70 % fishmeal/herringmeal!) and other vegetable proteins, feed phosphates, salts, dl-methionine, l-lysine, stabilized with antioxydant.
Doesnot contain any animal meals. Meets all requirements of latest E.U. regulations.

STANDARD SPECIFICATIONS
