## SICO TURF WETTER

*Natural organic plant extract wetter agent and soil penetrant  
(surfactant)*

*Improves performance of pesticides*

### **1. PRODUCT DESCRIPTION**

This new natural wetting agent and soil penetrant is a non-phytotoxic organic surfactant made with natural plant extract augmented with plant oils and a nutrient. These natural wetters improve water spread and penetration as well as providing natural plant materials that alleviate stress and improve nutrient uptake and translocation. It is best used as a foliar spray but can be included in trickle or flood irrigation water.

### **2. DIRECTIONS FOR USE**

**SICO TURF WETTER** should be applied at the rate of 3L per Ha mixed in a minimum of 300lts of water (300mls per 1000m<sup>2</sup> in a minimum of 30L of water).

Very effective as a soil penetrant for use with insecticides, fungicides and other non-foliar sprays when the target is below rather than close to the soil surface.

It is most effectively used with Chlorpyrifos to improve leatherjacket control and particularly to gain cost-effective control of deeper lying pests like Field Chafer grubs. Use with Axoxystrobin will improve Fairy ring control, and use with Carbendazim has been shown to improve persistence of worm-cast control.

**Timing:** Apply Year Round when frosts are not expected.

### **3. BENEFITS & ADVANTAGES**

- Naturally improves water and fertiliser penetration
- Improves performance of pesticides
- Softens hard or compacted soils, including heavily trafficked areas
- Improves stress recovery due to physical conditions, disease or pest attack.
- Programmed use will provide long term improvement in water holding and nutrient uptake capacity of treated areas
- Enhances foliar nutrients and can be tank mixed with fungicides and insecticides
- Will not burn or discolour fine grass species.

### **4. PACKING**

**Pack size:** 3L

**Pack coverage:** 10,000m<sup>2</sup>
