CELERY SEEDS

1. Common

Easy to grow, with the same flavour as normal celery; but produces lots of leaf, instead of stems for blanching. Ideal for soups, salads and seasoning. Very good aroma and taste. Winterhardy. For fresh market and industry (dehydration). Plant-height: 45-50 cm.

2. Tall Utah 52/70

A medium early variety with sturdy, dark green foliage. The stalks are long, thick, smooth and very fleshy. Plant-height is 55 -60 cm. and petiole length is 27-30 cm. Tolerant to Western Celery Mosaic and resistant to Brown Check. Keeps an attractive green colour for a long time.

3. Giant Pascal

A medium late variety with sturdy, dark green foliage. The stalks are long, thick, smooth and very fleshy. Plant-height is 55-60 cm. and petiole length is 26-28 cm. Pascal keeps an attractive dark green colour for a long time.
