SICOFLOR[®]
Plant substrate (Type 2)
Potting substrate (Art. no. 3364)

Revised edition 05/2016

APPLICATIONS

For all potted plants, bedding and balcony plants. The structure and nutrients of the substrate are ideally rated to the needs of the plants. Its moist condition means it can be processed in potting machines without any problems. After the plants have taken root, they must be fertilised depending on the plant type and size.
German high bog peat.

COMPOSITION

Mixture of approx. **70% vol.** slightly to moderately decomposed peat from raised bogs (white peat) and **30% vol.** highly decomposed peat from raised bogs (frozen black peat), lime and NPK fertiliser 18-10-20 with micronutrients, additional trace element fertiliser and wetting agent.

STRUCTURE

Medium

CHEMICAL PROPERTIES

pH value (CaCl ₂)	5.2 – 6.0
Salt level (KCl)	0.8 – 1.8 g/ltr
Nitrogen (N)	190 - 315 mg/ltr
Phosphate (P ₂ O ₅)	80 - 180 mg/ltr
Potassium oxide (K ₂ O)	240 - 400 mg/ltr
Electrical conductivity (μS/cm)	400 - 500
(50 ml substrate in 180 ml aqua dest.)	

PACKING

In 80 ltrs. (DIN) bags (= 70 ltrs. as per EN) or in big bags.

IMPORTANT INFORMATION:

All product information ceded by us was produced to the best of our knowledge and belief. There is no claim regarding their completeness and continuing or remaining correctness. We reserve the right to make changes in particular.

The deviations of the chemical substrate properties are within the tolerance limits in accordance with the guidelines of the quality association Substrate für Pflanzen e.V. [Substrates for Plants, Limited Liability Company].

All application and/or use-related recommendations on our part should be understood as non-binding guidelines and must be adapted to the local and usage-dependent conditions.

Our products should be stored in a cool place away from the sun and condensation; otherwise we cannot assume any liability. Moreover we do not accept liability with regards to the occurrence of saprophytic organisms and possible consequences e.g. growth of fungi.
