SICO-GRANUMOP min. 60% K₂O

Granular Muriate of Potash (Potassium Chloride)

Origin: Russia

Typical Analysis

Sample was analysed according to GOST and ISO Methods.

The following are the results of analysis performed at the SGS laboratory in St. Petersburg, Russia (sample no. 4499)

		<u>Standard Specifications</u>	<u>Analysis Results</u>
Moisture	(GOST 20851 4-93 div 1)	0.5 % max.	0.1 %
K ₂ O	(GOST 20851 3-93 div 1)	60.0 % min.	60.2 %
KCl	(calculated)	95.0 % min.	95.3 %
<u>Granulometry</u>			
more than 4 mm	(ISO 8397-88)	5.0 % max.	1.4 %
between 2-4 mm		85.0 % min.	92.8 %
between 1-2 mm		10.0 % max.	5.4 %
between 0.5-1 mm		2.0 % max.	0.2 %
less than 0.5 mm		0.5 % max.	0.2 %

Sampling

Samples were taken throughout the loading using mechanical sampler according to the international standards and a composite sample was prepared.

Composite sample was retained in airtight container until delivery to laboratory.
