PRODUCT INFO & DATASHEET

SICO LIQUISTAR IRON

1. DESCRIPTION

SICO LIQUISTAR IRON is a unique formulated blend of Iron from more than one source including Iron Sulphate complexed with lignated humic acids and adjuvants for improved tank mixing compatibility and economic rates of application.

2. FORMULA

Contents soluble in water: **5% w/w Iron**

3. USE

E.E.C. Fertiliser for use as a Iron nutritional supplement for agricultural & horticultural crops by foliar application to be used only where there is a recognised need. Do not exceed the appropriate application rates.

* **Application Rate**:

Ideally 2 to 3 applications of 2 to 4 litres per ha, each in 200 to 400 lts/ha water.
Repeat applications may be required where moderate or severe deficiency is known or identified by analysis.
Avoid applications during full flower.

* **Mixing and Spraying**:

Three quarter fill spray tank. Shake container and add slowly to the tank whilst agitating. Top up with water and spray. Wash hands before meals and after work. Safely dispose of empty container.

* **Application Timings**:

Other Crops: Susceptible to Iron deficiency, apply as early in the season as possible, providing there is adequate leaf cover. If symptoms are already visible, apply 4 litres per ha and follow up with 2 litres per ha on a seven to 10 day cycle. A programme of lower rates (2 litres per hectare) is recommended, as this always proves a more effective than any single higher rate application.

* **Compatibility**:

SICO LIQUISTAR IRON is physically and chemically compatible with a wide range of agrochemical products. Information is available from SAP INTERNATIONAL CORPORATION.

4. PACKING

10 ltr cans x 2 per box, 1300 ltr per pallet space, 13,000 ltrs per 20ft container.
