& DATASHEET

## **NATURACTIV<sup>®</sup> (or SICORGAN<sup>®</sup>) ORGANIC NPK** **4.3.3 + 1 MgO** *Some Field References*

### **1/ SOUTH KOREA**

Client started using NATURACTIV on his **ginseng** seedlings in October 2004. As the sand is very coarse, the seeds are sowed directly in the ground. He applied about 1500 kg of Naturactiv per hectare. After six months he discovered that the new plants were stronger and greener than before using this organic fertiliser. In addition, the germination rate increased from about 50-55% to 95%.

### **2/ PORTUGAL**

A) Client has used NATURACTIV on his **kiwis** for many years. Before he started using Naturactiv, an extensive testing programme was carried out. The results of these tests were very satisfying. When applying 1250 kg of NATURACTIV per hectare, the yield was increased by about 10%. Even more important for the growers, however, is that the percentage of kiwis that can be sold for consumption while fresh has been increased by 25%.

B) Another client started using NATURACTIV on his **tomatoes** many years ago. He and his brother run a 110-hectare horticultural business. Nowadays he uses NATURACTIV on almost all his crops, which include **courgettes, grapes, carrots, broccoli** etc. He has one field to which he applies 1250 kg of NATURACTIV once a year. Besides NATURACTIV, only a very small quantity of soluble fertiliser is added using drip irrigation. Although no regular chemical fertiliser has been used, the harvest of broccoli and the harvest of courgettes have increased each year.

**SICO ORGANIC FERTILISERS**
