& DATASHEET**

SICOSTAR P 30

Special liquid 30% w/w (42% w/v) P₂O₅ fertiliser

COMPOSITION

Phosphoric Anhydride (P₂O₅) soluble in water 30% w/w equivalent to 42% w/v at 20°C.

PRODUCT DESCRIPTION & ACTIVITY

SICOSTAR P 30 is a liquid fertiliser, which can be used at any time along the vegetal cycle, but it is particularly useful during the stages after transplanting, before flowering and along ripening.

Its distribution to the soil before sowing or transplanting is also recommendable, in order to improve germinability of seeds and rooting of plantlets.

SICOSTAR P 30 improves the germinability of pollen, the fruit set and consequently it increases the yield of any crop. This particular formulation assures a high mobility of the phosphoric ion even in alkaline soils.

METHODS & RATES OF APPLICATION

RATES			
Crop	Fertigation ltrs./1000 sqm / application	Foliar spray ml/100 ltrs water	Period
Ornamentals	0.5 - 2	100 - 150	At the start of vegetation and pre-flowering.
Nursery	1 - 2	100 - 150	At the start of vegetation.
Leafy vegetables	1.5 - 2	80 - 120	After transplanting.
Tomato, pepper, melon, cucumber, watermelon, carrot, cabbage, squash, pumpkin, potato	2 - 3	150 - 200	After transplanting, before flowering and along ripening.
Strawberry	1 - 2	150 - 200	After transplanting, before flowering.
Mango, papaya, tropical fruits	1 - 2	150 - 200	At starting of vegetation, before and after blooming.
Rice, tea, cotton	3 - 5	200 - 300	At starting of vegetation, before blooming.

COMPATIBILITY

SICOSTAR P 30 can be mixed with most common pesticides, except those having alkaline reaction and sun oil and fertilisers containing calcium.

CAUTION

Avoid spraying during the hottest hours of the day.

STORAGE

Store out of reach of children and pets. Do not store at temperatures below 0°C.

PACKING

1 / 5 / 10 / 25 / 200 lt. cans/drums.
