BROAD BEANS SEEDS

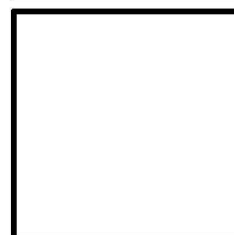

1. Aguadulce

An intermediate day length broad bean variety. Early maturity and high yields. Very long and hanging pods, containing 7 big, flattened seeds of creamy white colour.

2. Witkiem

Witkiem produces medium green pods, which contain 4 seeds per pod. The seed colour is white and are medium sized. Plant height is 110 cm and the pod length is 18 cm.

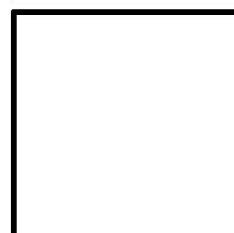

3. Giant Exhibition Longpod

Variety with an early maturity. Plant height is approx. 110 cm. Pod length is 18 cm and the colour of the pod is medium green. Seed colour is white. Pods contain 4 seeds per pod.

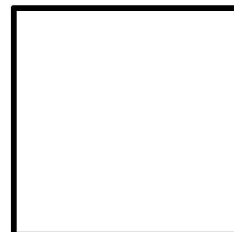

4. Sirene

Excellent, medium early variety for the processing industry. the plants are very firm (80-90 cm high). Pods are upright, 12-13 cm long, medium green and contain 4-5 seeds each. With mechanical harvest, the losses are minimal. The seeds stay white after cooking. Sirene is white flowering. The seeds are very small.

5. Threelfold White

Variety with a late maturity. Upright pod type. Produces small, white seeds (5 per pod). Pod colour is medium green and its length is 17 cm. Plant height is 100 cm.

6. Green Hangdown

Green Hangdown is a late variety which produces medium-dark green pods. Pods are 20 cm in length and contain 5 seeds per pod. Suitable for shelling fresh. Plants are tall (120 cm) and vigorous.
