# BROCCOLI SEEDS

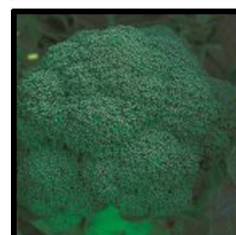

## 1. Bacino F1

Very early hybrid broccoli, maturing in 55 days from transplanting. Plants are strong, erect and have no side shoots. Heads are compact, dome shaped, medium large in size. Beads are medium fine and dark green in colour.

## 2. Balimo F1

High domed-shaped heads with small, fine bead size. Harvested in 70-75 days from transplanting. Medium tall plants with fine blue green beads. Excellent uniformity. Very good for processing and crown cut packing.

## 3. Green Calabrese

A widely adapted broccoli for main season in warmer areas suitable for fresh market. Plants are medium tall and mature in 85 days from direct seeding. Green Calabrese is a medium early, mainly multi-heading variety. The heads are dome-shaped, medium large and dark green in colour. Beads are medium to large in size.
