EGGPLANT SEEDS

1. Balsas F1

A very early hybrid variety with long oval fruits, which are 19x7 cm in size. Plants are fairly strong and medium tall and produce well developed, beautiful shiny-black fruits with green calyx and without spines. Suitable for greenhouse crops.

2. Ink F1

A very early hybrid variety of the oval-round type, 13-15 cm in length (Bonica type) for production under glass/plastic or outdoors. Plants are strong, sturdy and compact. Fruits are glossy dark purple-black. Ink F1 gives excellent high yields.

3. Bassano F1

Very early variety which produces fruits with a black purple colour. Average length is 15x8 cm. Very good setting. Firm and spineless fruits.

4. Bello F1

A very early maturing hybrid variety with black purple elongated fruits (21x7 cm). Plants are medium tall with large leaves. Suitable for outdoor cultivation. Fruits are very attractive and almost spineless.

5. Bakota F1

An early variety with nice glossy black coloured fruits which are medium long and oval to long oval in shape. Bakota is very uniform and sets fruits easily, both under high and low temperatures, which makes high yields possible. It is recommended for all season production in warm climates.

6. Bamako

An early maturing variety with short oval, deep black-purple fruits. Plants are medium vigorous, sturdy, somewhat compact and gives good yields. Fruit size is 17 x 9 cm. For fresh market and home garden.

7. Balmata

Early open field variety with heat tolerance. Plants are medium compact and produce long (24 cm), cylindrical, black purple fruits and with green calyx. Good yielder.

EGGPLANT SEEDS

8. Violetta Lunga 2 (=Long Purple 2)

Popular home garden and market variety with oblong shaped and purple coloured fruits, 21 x 6 cm in size. Plants are tall and upright (80-90 cm). Widely adapted, yielding six to nine fruits per plant. Medium early maturity.

9. Black Beauty

Well-known and popular home garden and market variety with short-oval shaped fruit. Very rich dark purple colour, 15 x 12 cm in size. Plants 65 to 80 cm tall, bushy and spreading. Widely adapted, yielding four to six fruits per plant. Maturity in days from transplant is \pm 80 days.
