1. Star F1

Vigorous hybrid, medium tall plant with large serrated leaves. Fruits have smooth, five-angle pods, 16 cm in length, which are medium-dark green and spineless. Early and easy setting variety. High yield potential.

2. Clemson Spineless

Uniform and prolific variety. Plants are 1,1-1,4 m in height and produce an abundance of medium green pointed pods without spines. The pods are best picked at 7,0-8,0 cm length, when produced for export purposes.
