POLE BEANS SEEDS

1. Green podded - Rustico

Rustico can be grown under plastic or in a glass house. Suitable for the fresh market. Plants are climbing and its vigour is medium-strong. Flowers are of a violet colour, seeds are black.

2. Green podded - Saphir

Early white seeded climbing bean with straight, stringless pods, 18-20 cm long and 8-9 mm wide. This variety is suitable for cultivation in greenhouse and plastic tunnel. Saphir is remarkably vigorous and its dark green pods are nicely situated in the plant. Resistant to Bean Common Mosaic Virus.

3. Green podded - Mantra

White seeded, stringless polebean with medium green leaves. Pods are flat and medium green and about 25 cm. long and a diameter of about 24 mm. Maturity is around 60 days. Resistant to Bean Common Mosaic Virus.

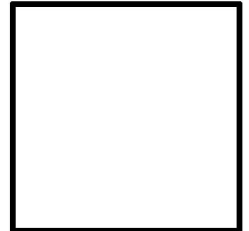

4. Green podded - Terts

Green podded pole bean, 5 days earlier compared to Helda. Terts is suitable for greenhouse cultivation. The 25 cm long pods are 22 mm wide and have an excellent flavour. Very productive variety which is stringless and resistant to Bean Common Mosaic Virus.

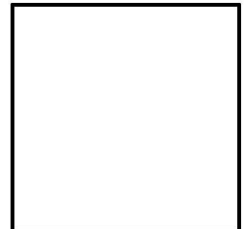

5. Green podded - Princess a rames type perle

A flat podded, stringless pole bean which is suitable for slicing. Can be grown on open field or in a glass house. Pod length is 12 cm and the diameter is 22 mm. Colour is medium green.

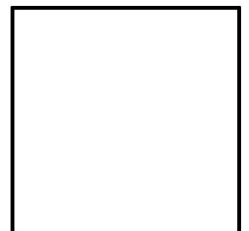

6. Green podded - Coco blanc a rames

A green podded, flat pole bean. Can be used for fresh or dry shelling. Can be grown in a glass house or on an open field. Plants are climbing and medium vigorous. White flowering.

7. Green podded - Blue Lake White Seeded

Excellent variety for fresh use, canning and freezing with early maturity. Pods are round, 15-17 cm. long, medium dark green, fleshy, stringless and with fine quality. Resistant to Bean Common Mosaic Virus.

POLE BEANS SEEDS

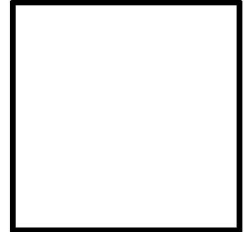

8. Green podded - Helda

The leaves of the plant are medium green, medium sized. White flowering. Pods are ready for picking in about 65 days. Light medium green approx. 25 cm. long, approx. 20 - 25 mm. wide, straight, flat stringless.

9. Green podded - Mombacher Speck

Green podded pole bean, suitable for the fresh market, grown on open field. Plants are climbing and vigorous. Flower colour is white. Pod shape is round-oval with a length of 23 cm and a diameter of 14 mm.

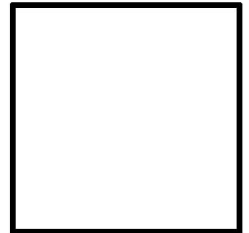

10. Green podded - Garrafal Oro

Green podded flat semi-dry/dry shelling pole bean. Garrafal oro can be grown in a glass house or on open field. Plants are climbing. Flower colour is violet. Pod are stringless and have a length of 19 cm.

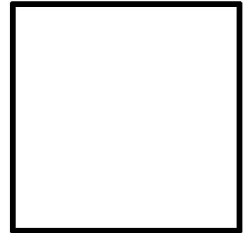

11. Green podded - Neckarkonigin

Medium maturity and high yielding variety. Pods are fleshy, round, up to 23 cm in length, medium dark green, stringless and with delicious taste. For fresh market and processing use. Resistant to Bean Common Mosaic Virus.

12. Green podded - Blue Lake Black Seeded

Green podded pole bean for the fresh market. Seed is black. Pods are round, stringless and have a length of 16 cm.

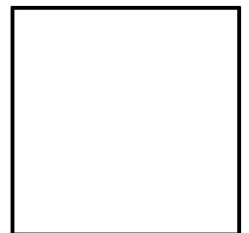

13. Green podded - Kentucky Wonder White

A medium early pole bean with long (21-23 cm), straight, round-oval pods (14 mm wide). Suitable for cultivation in greenhouse and open field. Variety is very well known for its consistent performance and high yields. Prolific variety which suits well in warm climates. Resistant to Bean Common Mosaic Virus.

14. Green podded - Kentucky Wonder Brown Seeded

A most popular pole bean variety which matures medium-late. The round oval pods are medium green, 22 cm. long and have excellent taste. Seed colour is brown. Resistant to Bean Common Mosaic Virus.

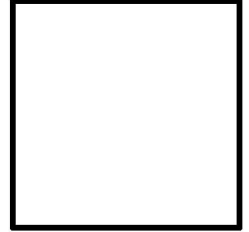

POLE BEANS SEEDS
