SPINACH SEEDS

1. Viroflay

Early maturing variety. Leaves are smooth and medium green. Used for early spring and autumn crop. Fast growing.

2. Matador

Plant: large and semi-erect with large leaves, smooth and medium to dark green in colour. Maturity: early, 48 days from sowing. Use: fresh market and processing. For spring, autumn and winter production. Rather slow bolting.

3. New Zealand (Tetragonia tetragonioides)

Variety suitable for home garden. Plants are large and spreading, leaves are small and thick and have a deep and rich green colour.
