

**PRODUCT INFO
& DATASHEET**

SICOCOTE® SUPER-H TOMATO OD (4-5 M)
NPK 10.05.20 + 7 CaO + 3 MgO
CONTROLLED RELEASE FERTILISER (CRF) (4-5 months)
BALANCED, ESSENTIAL NUTRITION FOR FIELD GROWN TOMATOES

Item Code: H11

9/2017

1. General information on SICOCOTE SUPER CRF.

SICOCOTE® SUPER: EVERY TIME THE RIGHT SOLUTION AND CONTROL !
 TRULY SUPERIOR Advanced Controlled Release fertiliser technology, bringing important benefits:

- **PRECISION**
- **ECO FRIENDLINESS**
 - Practically no leaching or volatilisation of nutrients
 - Organic based coating that degrades naturally in time
 - Less maintenance and irrigation needed thanks to stronger plants and healthier root systems
- **PREDICTABILITY**
- **HIGH RETURN ON INVESTMENT**
- **COMPLETE AND SAFE NUTRITION**
- **HIGHLY EFFICIENT AND ECONOMICAL**
 - Formulation and release curve are turned to the specific plant needs

SICOCOTE SUPER is a mineral fertiliser with a polymer coating made from organic materials, which degrades naturally in time. The coating encapsulates the Nitrogen (N), Phosphorus (P) and Potassium (K) as well as other nutrients or trace elements.

SICOCOTE SUPER releases the right amount of specific nutrients over a given period of time. After being applied, the granule attracts water and it passes through the coating. The dissolved nutrients are subsequently released into the soil due to osmosis and dissolving. Depending on the product design the nutrients are released over a period from 2 to 18 months. The release period is predictable, no nutrient leaching occurs and the product is safe against scorching.

HOW SICOCOTE SUPER WORKS :

2. SICOCOTE® SUPER-H TOMATO OD:

Benefit from the advantages of controlled release fertilisation with SICOCOTE® SUPER-H TOMATO OD. This well balanced NPK formula is enriched with additional Mg and Ca for healthy and disease resistant crop development without deficiencies. Apply just once at the beginning of the growing season and cut down on labour and transportation costs significantly. The reliable polymer coating acts as a membrane and releases the essential nutrients in a controlled and predictable way that match the uptake needs of the crops.

Environmentally friendly

- * Organic based polymer coating that degrades naturally in time
- * Practically no leaching or volatilisation of nutrients
- * **Less fertiliser necessary to achieve optimum results**

Precise controlled nutrition

- * Reliable polymer coating secures uninterrupted nutrition for up to 5 months
- * Extra Magnesium and Calcium for healthy and stress-resistant plant growth without deficiencies
- * Formulation is tuned to the requirements of field grown tomato varieties
- * Predictable nutrient release not influenced by rain, irrigation, soil composition, soil pH-value or bacterial life

Highly efficient and economical

- * Single application is enough for up to 5 months of uninterrupted nutrition
- * Less disease control needed due to healthy, stress-free plant development
- * Apply only once and gain significant savings in labour cost and time

Any information in this publication is believed to be accurate and is given in good faith, but is for the customer to satisfy himself of the suitability for his own particular purpose. No representation, warranty or guarantee is made to its accuracy, reliability or completeness.

3. * Product specifications

ITEM CODE	H11
Total Nitrogen as N	10 %
Nitric Nitrogen (N-NO ₃)	4.3 %
Ammoniacal Nitrogen (N-NH ₄)	5.7 %
Phosphorus Pentoxide P2O5	5 %
Soluble in neutral ammonium citrate and water	
Water soluble	4.5 %
Potassium as K2O	20 %
Water soluble	20.0 %
Calcium Oxide CaO	7 %
Magnesium as MgO	3 %
Sulphur Trioxide SO3	18 %
Water soluble	17.0 %
Chloride content Cl	< 1 %

*** Physical properties**

Average granule size: 3.2 mm
 Colour: grey/ivory/brown
 Product longevity determined in months (M) at average soil temperature as given below.

Longevity at 15° C	Longevity at 21°	Longevity at 30°
7 M	6 M	5 M

*** Coating specifications**

Coating material: degradable polymer coating
 Coated N of total N: 100 %
 Coated P₂O₅ of total P₂O₅: 100 %
 Coated K₂O of total K₂O₅: 100 %

4. Recommended application methods & rates

* Recommended application method: row application or mix in soil.
 * Advised application period: at planting/sowing
 Suitable for the fertilization of open field tomato varieties.

Irrigation after application gives a quicker initial effect and improves product and plant performance.
 As soil and farming conditions differ, please contact your dealer or SICO sales representative for specific product and application advice.

5. PACKAGING

- 25 kg dual layer pe bag with anti-slip varnish
- pallet loading: 40 x 25 kg
- 500 kg pp big bag

6. STORAGE AND SAFETY

Store in unopened original packaging in a dry place protected from frost, heat or direct sunlight. Once opened reseal tightly and keep in a dry place.
 Caution: Harmful if swallowed. Do not inhale. Keep out of reach of children.
 Safety data sheet available upon request.
