SICOMICRO HIGH-TECH GRANULAR MICRONUTRIENTS (with special properties)

SICOMICRO-CLEVER

*10% Ca + 4% S + 4% Si + 3% Mg + 1.5% Zn + 0.1% Cu + 0.5% Mn +
0.5% B + 1.0% Fe + 0.0025% Mo
in a single granule (2-4 mm) - Origin: China*

1/ PRODUCT DESCRIPTION & TECHNOLOGY

Trade name : SICOMICRO-CLEVER
HS Code : 382490
Release type : quickly and consecutively

Introduction: SICOMICRO-CLEVER is a granular micronutrients fertiliser specially developed to meet the needs of fruittrees during tree growth and fruitings, using three core technologies.

2/ PRODUCT SPECIFICATIONS

*** CHEMICAL ANALYSIS**

Ca	: 10 %	Cu	: 0.1 %
S	: 4 %	Mn	: 0.5 %
Si	: 4 %	B	: 0.5 %
Mg	: 3 %	Fe	: 1.0 %
Zn	: 1.5 %	Mo	: 0.0025 %

*** PHYSICAL PROPERTIES**

Form	:	granules
Size (pass by 90%)	:	granular 2-4 mm
Appearance	:	brownish
Hardness	:	2.0 min kg
Bulk density	:	1100 kg/m ³

3/ USAGE RECOMMENDATIONS (as guide only)

- Can be used as straight fertiliser or as raw material in bulk blended fertilisers.
- Can be applied to various fruit trees, avocado, lemon, grape, orange, apple, pear, banana, mango, kiwi fruit and blueberry, sugar beet, sugarcane etc.
- Indicative usage rates (to be used as a guide only):
 Field Crops : 75-225 kg/ha – Vegetables, fruit etc : 90-200 kg/ha

Constantly supplies micronutrients to soil and plant, effectively improves fruit quality and color, and prevents various diseases and pests.

4/ TECHNOLOGIES

*** SEMI CHELATE process:** The Semi-chelate process begins with a natural small-molecule chelate carrier. The carrier is treated with a biological process, that enables appropriate chelation of the nutrient element by the chelate carrier, and prevents soil fixation and nutrient loss. The semi-chelate carrier component is small, allowing it to pass freely through the cytoderm of plants, realising superior nutrient transmission.

Traditional chelate products are fully chelated, requiring more energy to release nutrition after entering into the plant. SEMI-CHELATE easily chelates, while requiring less energy to release nutrition, so it is more efficient and economical.

*** GRAN-TECH:** Advanced (Japanese) granulation technique results into superior appearance and composition: well rounded granules of consistent size, having high strength with low specific gravity. These characteristics make SICOMICRO products particularly well suited for mechanical fertilisation.

*** TCR Technology:** Farmers are confronted with the problems of changing soil conditions and varying plant needs throughout the growth period. TCR technology can adjust granular fertilisers to delay or accelerate their release of nutrients to optimize the availability of nutrients over the environmental and growth cycles, effectively improving fertiliser utilisation and reducing the total amount of fertiliser that is required.

5/ PACKING

In 25 kg net wpp+pe Sico bags (loose bags), about 25 MT/20ft container. Other packings: on request.

Any information in this publication is believed to be accurate and is given in good faith, but is for the customer to satisfy himself of the suitability for his own particular purpose. No representation, warranty or guarantee is made to its accuracy, reliability or completeness.
