X-FACTOR

*Unique formulated Zn and Mn liquid nutritional supplement
for foliar application
EC Fertiliser*

09/03/2018

1/ PRODUCT DESCRIPTION

X-FACTOR is a unique formulated blend of the essential elements Zinc and Manganese complexed with lignated humic acids and adjuvants for improved tank mixing compatibility and economic rates of application.

Contents: 6% Ureic N + 1 % Mn + 1 % Zn (w/w), soluble in water

2/ RECOMMENDATIONS

*** APPLICATION RATE:**

X-Factor can be used on all field crops. Ideally 3 applications of 2.5-5 litre per ha, each in 200 lts/ha water. Repeat applications may be required where moderate or severe deficiency is known.

*** MIXING AND SPRAYING:**

Three quarter fill spray tank. Shake container and add slowly to the tank whilst agitating. Top up with water and spray. Wash hands before meals and after work. Safely dispose of empty container.

*** APPLICATION TIMINGS:**

Cereals: Early tillering to second node detectable (Zadok's Growth Stages 14-32). For Autumn sown crops a part application prior to Winter dormancy is strongly recommended.

Potatoes: From one week after 100% emergence

Maize: 3 – 8 leaf stage.

Peas and beans including soya: apply 2.0 litre per hectare as early in the season as possible, providing there is adequate leaf cover.

Vegetable and other field crops: apply 2 litre in sufficient water at 3 to 5 true leaf stage

Tree crops (Fruit crops): apply 5 litre per 200 litres water in spring, up to 2500 litres water per hectare depending on maturity of trees.

3/ COMPATIBILITY

X-Factor is physically and chemically compatible with a wide range of agrochemical products and has been found to increase the efficacy of many fungicides and insecticides. Information is available from Sap International Corporation bvba.

E.C. Fertiliser for use as a Zinc and Manganese nutritional supplement for agricultural/ horticultural crops by foliar application to be used only where there is a recognised need. Do not exceed the appropriate application rates.

4/ PACKING

20 ltr cans, on pallets, 1600 ltr per pallet space, 16,000 ltr per 20' fcl. Other packings on request.
