& DATASHEET**

SICODIS SD

SPRAYABLE TEAT DIP WITH PERFECT ADHESION !

DESCRIPTION

SICODIS SD is the sprayable version based on active iodine. It has excellent disinfecting and skin conditioning properties. SICODIS SD adheres well to the skin but does not cause blockages of spray lines.

SPECIFICATIONS

Appearance : dark brown liquid
pH (1 %) : ca. 5.35
Density (20°C) : ca. 1.030

PROPERTIES

SICODIS SD is :

- A perfect teat protection thanks to the high and stable active iodine concentration : 3000 ppm.
- Efficient against bacteria causing mastitis : Staphylococcus aureus, Streptococcus spp, Escherichia coli, ... , even in presence of organic matter.
- Healing and skin conditioning thanks to a high level of emollients.

APPLICATION

SICODIS SD is suitable for spraying on the teats immediately after each milking. SICODIS SD can also be used in a dip cup.

SICODIS SD is ready for use, you don't have to dilute it.

SAFETY DATA / PRECAUTIONS

Don't mix with other chemical products.
Always use a clean sprayer or dip cup.
Discard any teat dip that becomes dirty.
Please check the MSDS.

PACKING

20 lt cans
