F1 HYBRIDS

for Central & South Asia

1/2019

BASTILLA F1 – round tomato

Market fit : Indeterminate, medium strong, vigorous variety with good fruitsetting ability. Recommended for production in greenhouses and in the open field. Fruit are medium large (180-200 gr), deep oblate in shape, no green shoulders and very firm. High yielding and resistant/tolerant to Tomato Mosaic Virus, Verticillium, Fusarium 0+1, Nematodes, Tomato Yellow Leaf Curled Virus and Tomato Spotted Wilt Virus.

HAVANNA F1 – round tomato

Market fit : An indeterminate, medium strong, vigorously growing variety. It has firm fruit, 190-200 gr in weight. The fruit are flattened globe shaped without green shoulders and are jointed with beautiful large, flat, green calyx leaves. The variety has resistances against Tomato Yellow Leaf Curl virus and Tomato Spotted Wilt virus.

BARNUM F1 – elongated tomato

Market fit : The plants are vigorous, have good cover with very high yields. The fruits are borne in large clusters of 6 to 7 fruits and are semi joint less. A very consistent high yielding variety with resistance to Nematodes.

VENISE F1 – elongated tomato

Market fit : With a strong growing compact plant with good cover, this variety combines a very good disease package with good adaptability to high temperature fruitsetting of large fruit. It bears large jointless fruit of 130-140 gr and has resistance against Verticillium, Nematodes and Tomato Yellow Leaf Curl Virus (intermediate).

TRIGGER F1 – peper sweet

Market fit : A hybrid green to red bell pepper. Strong plant habit with good foliage cover. The thick walled fruit are square and excellent for fresh market. Picked at a green or bright red stage. A good disease package adds to the healthy production in open fields.

BALSAS F1 – half long eggplant

Market fit : A very early hybrid variety with long oval shaped fruits, 19x7 cm in size. The plants are fairly strong and medium tall and produce well developed, beautiful shiny-black fruits with a green calyx and without spines. It is suitable for greenhouse and open field crops.

BASSANO F1 – half long eggplant

Market fit : A very early hybrid variety with oval shaped fruits, which are 15x8 cm in size. The plants are fairly strong and medium tall and produce well developed, beautiful shiny-black fruits with a green calyx without spines. It is high yielding, indoors and outdoors.

ROI SOLEIL F1 – SU sweet corn

Market fit : An 83 day large eared SU type sweet corn. With tall strong plants. The ears are 22 cm long with a 22 row count and 5-6 cm diameter. The kernels are dark orange yellow and refined with a medium sweet taste.

AVALLON F1 – Crimson sweet watermelon

Market fit : This is a very large Crimson type diploid watermelon. The large fruit set well under warm conditions and the fruit leaf protection is extremely good.

ANTALYA IMPROVED F1 – Galia melon

Market fit : Early Galia type. Plants are vigorous with excellent fruit setting. Fruits are 1.2-1.8 kg in weight, round in shape, orange-yellow at full maturity and with netted rind. Flesh is light green in colour, very sweet and aromatic with a small seed cavity. It is resistant to Fusarium race 0+1 and Powdery Mildew 1+2.

EVERY TIME THE *right* SOLUTION

BALI F1 – long cucumber

Market fit : Early, all female flowering hybrid of the Long Dutch cucumber type, suitable for greenhouse production. The dark green fruits are very attractive, 32-34 cm in length, slightly ribbed, straight and without neck. Bali is a very high yielding variety, both for soil and substrate, for heated and unheated intensive cultivation. Highly resistant to Scab and intermediate resistant to Cucumber Mosaic Virus, Powdery and Downy Mildew.

NELSON F1 – short cucumber

Market fit : Very early high yielding hybrid in protected cropping, for a concentrated harvest period. It has a good vigour and an open plant habit. Multiple fruits per node. The fruits have a uniform shape, dark green colour, with an average length of approx. 17-19 cm. It is suitable for spring and autumn production. Highly resistant to ScaPowdery Mildew.

ROCKY F1 – cauliflower

Market fit : Early maturing variety for tropical and sub-tropical areas. Tolerant to discolouration, heat and cold. It can be harvested 75-80 days from transplanting in Southern climates. Pure white colour, rather smooth and semi-dome in shape. Plant is medium large, upright and strong growing. Medium leaf-cover. Tolerant to Downy Mildew.

BALIMO F1 – broccoli

Market fit : High dome shaped heads with small, fine bead size. Harvested in 70-75 days from transplanting. Medium large plants with fine blue green beads. Excellent uniformity. Very good for processing and crown cut packing.

HARBAD F1 – pepper hot

Market fit : An early hybrid variety for sub-tropical and cool climates. The plants are vigorous, medium tall and spreading. Fruits are medium in size, 15 x 2.2 cm, smooth and dark green in colour. Red at full maturity. Flesh is medium thick and pungent. Highly resistant to Bacterial Spot Race 1, 3 and PVY. High yielder for fresh market and processing.

MINAB F1 – white onion

Market fit : A round, white intermediate day onion, which is very suitable for the Middle Eastern countries. The bulbs are hard and pungent with good storage ability under good conditions.

RED KING F1 – red onion

Market fit : Later short day onion for fresh market. The bulbs are top shaped, medium sized, firm with a red exterior colour and red exterior inner scales. The outer scale leaves are lighter red and the bulbs have with medium to thin necks. It shows fair storage quality, good bolting tolerance. When ripened, the bulbs are mildly pungent.

TAJ F1 – yellow onion

Market fit : A yellow fleshed short day onion. The size of the bulbs is between 250-300 g and the shape is top shaped to round. The variety produces a high yields of yellow straw to light brown colored bulbs with storage ability of 2 – 3 months maximum.

CLARION F1 – light green Squash

Market fit : A slightly darker light green club shaped Lebanese type Squash. It delivers high yields on nice open vigorous plants.

MINI ISATIS F1 – short cucumber

Market fit : This is a dark green mini Beth Alpha type cucumber. It bears high yields of multiple fruit at each internode. The fruit are 10 cm long and are well adapted for autumn and spring cultivation.
