SICO®-PROTURF

Range of premium quality organic and organo-mineral TURF fertilisers for professional use

The **SICO-PROTURF** range brings professional solutions for treatment on golf courses, football pitches, sport- and cricketfields, amenity etc.

Poor root formation, high salt concentrations, potassium or other deficiencies, moss problems or dry patch problems **SICO-PROTURF** fertilisers are the right solution to a lot of these problems.

EVERY TIME THE RIGHT PROFESSIONAL SOLUTION !

SICO-PROTURF = PREMIUM QUALITY

- Specially developed for professional use.
- Extremely sustainable and respect the environment
- Releases their nutrients gradually over a period of 2-3 months (depending on their ingredients composition and chemical analysis).
- Special crumb technology (see special notice). Available in 2 specially developed crumb sizes :
 - **Sico Microcrumb (MC)** : size 0.7 – 2.1 mm
 - **Sico Regular Crumb (RC)** : size 2.1 – 3.5 mm
- Production with eco-friendly solar energy : solar panels provide enough energy to produce our SICO-ECOGREEN & SICO-PROTURF and SICO-ECOPROF fertilisers. By using the sun as our partner, we decrease the CO₂ emission in the atmosphere !
- Available in 25 kg net polythene bags or 1000 kg big bags

PRODUCT RANGE SURVEY

1/ PROTURF STARTER NPK 18.3.3 (35 OM) (MC/RC)

Product description: **Proturf Starter** is a well balanced, organo-mineral fertiliser specially composed for preseeding. Ideal for the fertilisation of golf courses, football & sport fields. This formulation, with fast acting mineral nitrogen and partially organic slow working nitrogen can also be applied after sowing to establish a good 'start' of the lawn. Slow release activity up to 3 months and guarantees a continuous growth. This formula contains fast and slow working components.

2/ PROTURF FAIRWAY NPK 9.3.5 + 3 MgO (30 OM) (MC/RC)

Product description: **Proturf Fairway** is a special formulation for fertilisation of fairways, roughs, semi-roughs and tees. This well balanced, organo-mineral fertiliser contains extra magnesium for deep green colors. Its high nitrogen concentration guarantees fast and continuous action for up to 3 months.

Proturf Fairway improves soil structure and enhances soil life. Guarantees a balanced growth of the turf.

3/ PROTURF GREEN PELOUSE NPK 16.3.8 + 2 MgO + 1 Fe + Bacteria (25 OM) (MC/RC)

Product description: **Proturf Green Pelouse** is a specially developed for golf courses, cricket- and football fields and green areas. The specific and unique composition guarantees a long release activity up to 3 months and green vivid colors due to the presence of iron in combination with the magnesium. **Proturf Green Pelouse** is an organo-mineral fertiliser with immediate action which releases the nutrients gradually. This formulation gives a better resistance to drought and intense access of the treated play-area. It is enriched with useful bacteria which decompose the organic waste (thatch) into lawn feed.

4/ **PROTURF AUTUMN NPK 5.5.20 + 3 MgO (25 OM) (MC/RC)**

Product description: **Proturf Autumn** is an organic based fertiliser for application in colder periods (autumn use). Contains extra magnesium for green colors through autumn and wintertime. Contains potassium concentration to fortify turf during the winterperiod. **Proturf Autumn** can be used at the end of the season, together with mechanical care. Less risk of leaching. Can be incorporated into the upper layer during construction of the turf. Application of **Proturf Autumn** results into a stronger turf with better conditions for next spring. When using high concentrations of this fertiliser **it has an indirect moss inhibiting effect** (less sensible for sickness, diseases, plague, bad weather conditions).

5/ **PROTURF RECOVERY NPK 8.6.13 + 3 MgO + Sico-Humiplex® (25 OM) (MC/RC)**

Product description: **Proturf Recovery** is a well balanced organic fertiliser with unique composition which is proven ideal for fertilisation after scarification or to apply as preseeded. The presence of magnesium guarantees green vivid colors. **Proturf Recovery** contains **Sico-Humiplex®**, this is a combination of humic acids and fulvic substances to optimise root formation and the in-rooting (after sowing) of the seeds. Can also be used in combination with verti-draining. This fertiliser works up to 100 days.

6/ **PROTURF POTASH NPK 0.0.32 (MC)**

Product description: **Proturf Potash** is an organo-mineral fertiliser with very high content of potassium. Ideal to apply in autumn on poor sand- based pitches/soils. With a gradual release of the nutrients this fertiliser increases the resistance against drought and intensive access of the treated pitch. Works up to 2 months.
